About Me

Hi, I'm Sushant Rao, a passionate web developer specializing in React, Node.js, and frontend development. With a strong foundation in building dynamic and responsive web applications, I thrive on creating seamless user experiences and pushing the boundaries of what is possible on the web.

Projects

FEEDBACK SYSTEM

The Feedback System is a web-based application that I developed to streamline the process of collecting and analyzing feedback from teachers on student performance. Through the system, students can anonymously vote the teacher, send them feedback. I also developed a teacher portal where a teacher can view his/her personal insights. Hence the data of the votes can be accessed by teacher easily. I used the React Library along with Firebase for this.

Responsive Image Gallery

It is a Web Based Image Gallery which contains 5 images which has a slide in-out animation when clicked on it. I created this website using plain HTML, CSS and JavaScript..

Education

2019

DP School

10th

I Completed my 10th Std at De Paul English Medium High School with 82.60 percentage of marks

2021

ASCC Rahuri

12th

I Completed my 12th Std at ASCC Rahuri with 83.00 percentage of marks

2021-2025

JSPM RSCOE

B-TECH IT

I am currently pursuing Btech IT at JSPM RSCOE with my current CGPA as 8.88

Language

HTML

CSS

JavaScript

TypeScript

Python

Expertise

- ui/ux
- Frontend
- Backend(familiar)
- React
- FireBase
